

The trust layer between *brands × creators.*

Algorithmic matching. Smart contracts. Milestone-based escrow.

The infrastructure sponsored content has been missing.

CONFIDENTIAL

Founder pitch · v2.0

Influencer marketing has *a trust problem.*

Both sides — brands and creators — have learned to expect the worst. Four broken patterns we hear in every conversation:

Fake audiences

1 in 3 followers on top-tier creators are bots or inactive. Brands pay for reach that doesn't exist.

Ghost delivery

Creators take money upfront, then never post. No refunds, no recourse, no accountability.

Opaque pricing

Same creator quotes \$3K to one brand, \$9K to another. Rate cards are a guessing game.

AI spam outreach

Mass-AI DMs have trained creators to ignore everything. Reply rates are now in single digits.

The trust gap is *wider* than ever.

Three signals from the industry — the order of magnitude tells the story.

\$1.3B+

Estimated lost to influencer fraud per year
across the global creator economy

~70%

Of brand outreach DMs go unanswered. AI-
generated spam has poisoned the channel

3–5×

Range a single creator's rate quote varies,
depending on who's asking

Sources: industry estimates • CreatorIQ, HypeAuditor, internal partner conversations.

“

Brands don't need *more* creators.
They need creators they can
trust.

And creators don't want more brand DMs. They want partnerships that respect their work — and actually pay them on time.

● MEET

One platform. Three primitives.

Zentron Solutions replaces the broken DM-and-Venmo workflow with infrastructure designed for both sides of the handshake.

01

Algorithmic matching

Five-dimension scoring beyond follower count — audience, engagement, fit, history, health.

02

Smart contracts

Standardized digital agreements. Clear scope, deliverables, exclusivity, usage rights.

03

Milestone escrow

Funds locked at signing. Released progressively as work is verified.

Five dimensions. One *score*.

Competitors match on follower count and category. That's why their campaigns underperform. Zentron scores creators on signals that actually predict outcomes.

FINAL MATCH SCORE

94/100

Top 0.4% of available creators

Audience overlap 91

Engagement quality 88

Content style fit 96

Historical performance 82

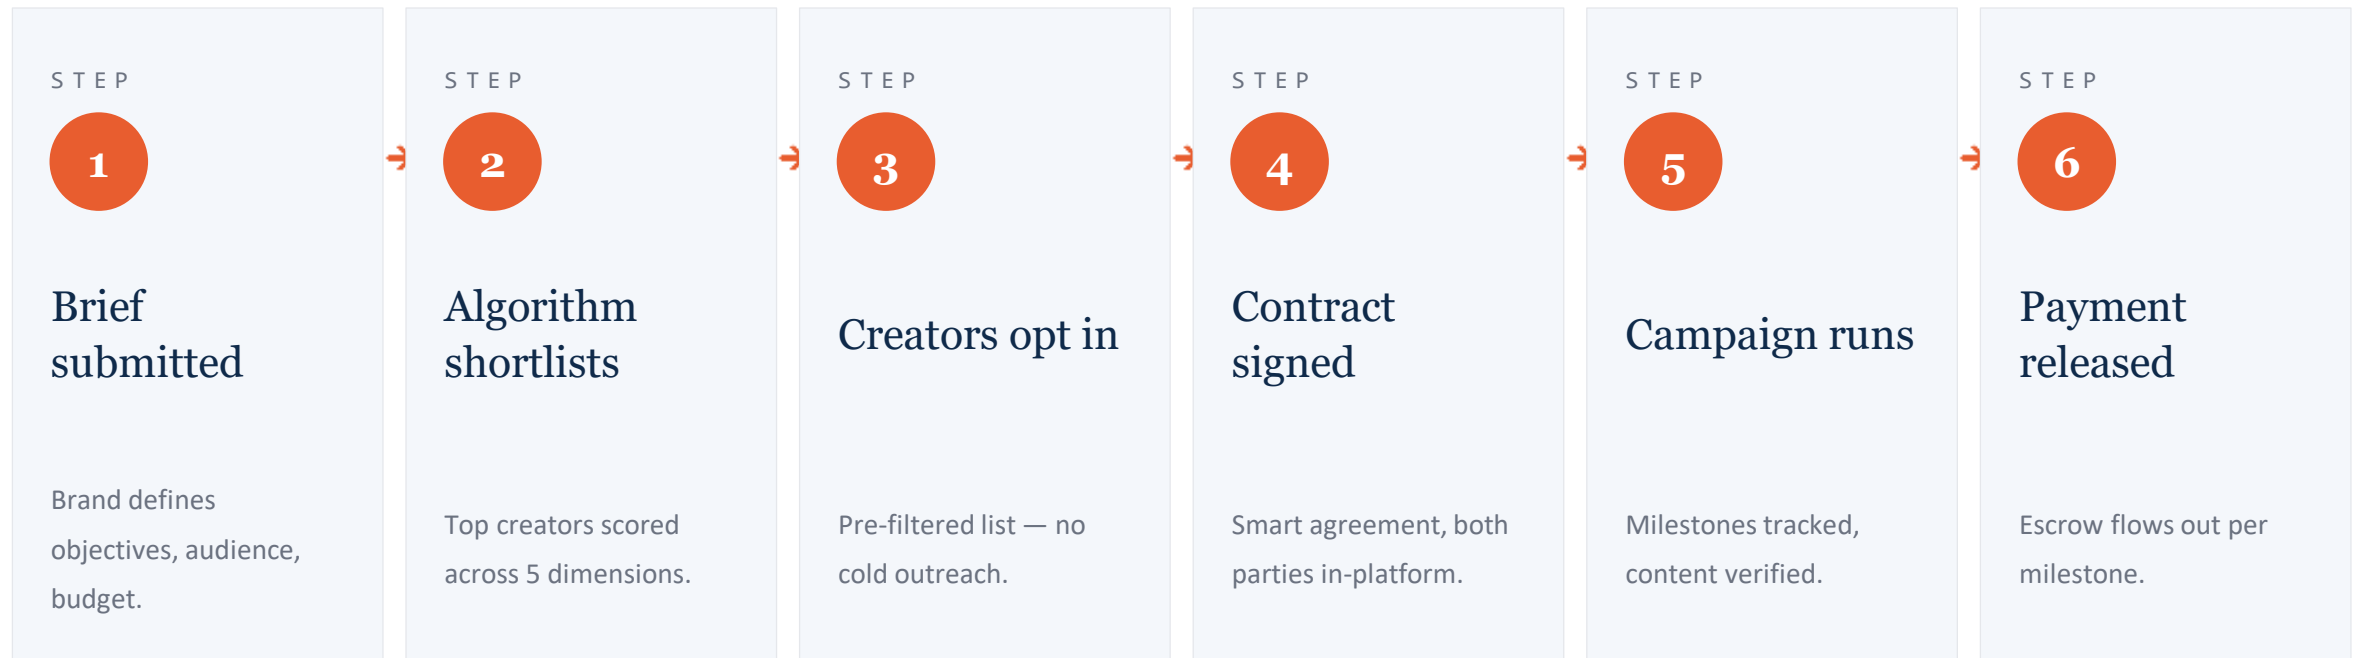

Audience health 94

Six steps from *brief* to *paid*.

End-to-end campaign workflow — each step gated by a verification or contract trigger.

Payment that *moves* with the work.

THE DM-AND-VENMO ERA

Upfront-pay

- Brand pays 100% before work
- Creator may underdeliver
- No accountability
- Disputes = direct conflict

Bad for brands.

THE AGENCY STANDARD

Net-30 invoicing

- Creator delivers, then waits
- 30–90 day payment delays
- Late payments are normal
- Cash flow killer

Bad for creators.

THE ZENTRON WAY

Milestone escrow

- ✓ Fee escrowed at signing
- ✓ Released per milestone
- ✓ Avg release: under 48h
- ✓ In-platform disputes

Built for both sides.

Three revenue streams. *No surprises.*

Aligned incentives — we earn when campaigns deliver, not before.

01 • COMMISSION

Pay-per-success

8%

PER CAMPAIGN

Zero upfront fees. Aligned incentives.

02 • SUBSCRIPTION

Scale tier

\$499

PER MONTH

For brands running 4+ campaigns monthly. Reduced 3% commission.

03 • VALUE-ADD

Custom services

À la carte

ONE-OFF

Strategy, brief writing, performance reports, featured placements.

GROWTH FLYWHEEL

★ **FREE**

for brands & creators

★ **10% OFF**

first collab via referral

★ **ZERO RISK**

we earn only on live campaigns

A market growing faster than its tools.

Creator economy spend is exploding. Infrastructure to manage it hasn't caught up. We're building the rails.

Become the *trust layer* for the creator economy.

YEAR 1

Prove the model

500 verified creators. 30 paying brand partners.
Two anchor verticals — D2C and AI tools. Public
rate-card v1 live.

YEAR 3

Cross-market scale

3,000 creators across 20 markets. Major brand-
side integrations (Shopify, HubSpot).
Performance-refund SLA proven at scale.

YEAR 5

Default infrastructure

Every serious brand checks our trust score before
signing a creator. Verified-by-Zentron becomes
the industry standard.

LET'S BUILD

the trust layer the creator economy
actually needs.
